

## Counteract dry hands and cracked nails

**Ulm, 2 April 2020 – Constantly washing your hands puts particular stress on your skin, especially in the times we are currently witnessing. Your hands can feel dry and nails become brittle and cracked. Thanks to the MP 70 Paraffin bath and the MP 64 Manicure/pedicure set, you can care for your hands and nails directly at home in just a few steps.**

### **MP 70 – Paraffin bath for an intensive care treatment**

The MP 70 Paraffin bath provides an intensive care treatment thanks to the application of warm, liquid paraffin wax. This gives stressed hands, feet and elbows noticeably supple, soft skin. After warming up the wax in the MP 70, the body areas to be treated are alternately immersed in it for a short period of time and removed again. Once the wax has hardened, the process is repeated six to seven times. The pleasant warmth of the paraffin wax opens the pores of the skin and promotes circulation. A film is placed over the areas being treated to help the absorption of nutrients and moisture. After an exposure time of 20 minutes, the film can be taken off and the wax can be removed.

### **MP 64 – Nail and foot care at home**

With the powerful MP 64 battery-powered device, you can carry out your own manicures and pedicures perfectly from the comfort of your own home. Nails in poor condition are cared for and shaped. With three speed settings and ten high-quality attachments for caring for the fingernails and toenails, as well as an attachment for removing calluses, you can tailor the application precisely to your needs. The attachments are also suitable for diabetics. The ergonomic design prevents slipping during treatment. Safety is ensured by an automatic switch-off function after 20 minutes. The device can be recharged within three hours using the micro USB port, and is then ready to be used again for two hours – cable free using the battery power.
