

Clear airways for your little ones: new products in the Babycare range

Ulm, 11 February 2020 – Winter time is cold virus season! Infants are especially prone to runny noses and coughs at this time of year. Parents search despairingly for the right treatment, so that their little ones feel better again quickly. The gentle use of nebulisers or nasal aspirators can be a remedy. Beurer has expanded its range to include various medical devices that help relieve the airways of babies and infants.

NA 20 – nasal aspirator: effective, gentle and easy to use

Babies rely on their nose to breathe, as they only have a rudimentary ability to breathe through their mouth at this stage of their development. The NA 20 nasal aspirator is an effective means of removing nasal secretion from little blocked noses, by using controlled suction power up to a maximum of 66 kPa. It not only relieves breathing and food intake, but also helps to aerate the nose, sinuses and ears better, thus preventing germs from spreading as easily. This significantly decreases the risk of contracting sinusitis, a middle ear infection or bronchitis. The ergonomic design and the practical one-button operation of the NA 20 make it easy to use. The nasal tip is especially quiet and the detachable elements are easy to clean. There are also two soft, disinfectable silicone attachments for solid and liquid nasal secretion included in delivery.

Making inhalation fun with the "Kids" edition

You can recover from colds and other respiratory diseases like asthma faster if you use inhalation. The IH 26 Kids and IH 58 Kids models are child-friendly nebulisers with cheerful designs that are now immediately available. Their simple operation makes them particularly easy to use. The nebulisation of liquid medication for treating the upper and lower airways is carried out using compressed-air technology. The high nebulisation performance of approx. 0.3 millilitres per minute (IH 26 Kids), or 0.25 millilitres per minute (IH 58 Kids), allows inhalation to be carried out effectively in next to no time. The attachable jolly

giraffe will help distract the child in a playful way during treatment. Both devices can be disinfected and come with the following accessories: silicone children's and baby mask, angled fitting, mouthpiece, atomiser, 10 filters, hose.

Technical data:

IH 26 Kids nebuliser

- Compressed-air nebuliser
- Particle size (MMAD) 3.07 μm
- Working pressure approx. 0.8 – 1.45 bar
- Nebulisation performance approx. 0.3 ml/min
- Incl. extensive child-friendly accessories

IH 58 Kids nebuliser

- Compressed-air nebuliser
- Particle size (MMAD) 4.12 μm
- Working pressure approx. 0.25 – 0.5 bar
- Nebulisation performance approx. 0.25 ml/min
- Quiet and especially practical when travelling
- Incl. extensive child-friendly accessories

About Beurer

Beurer was founded in 1919 in Ulm and is synonymous with health and well-being. Today the long-standing company leads the way in several product fields in this segment; the company is the market leader in Europe in the area of flexible heating and the market leader in Germany for blood pressure monitors and massage products. Beurer is also one of the leading European suppliers of personal scales. This portfolio is constantly being developed further in all areas and offers products for use at home. It includes personal scales, kitchen scales, luggage scales, air cleaners, air dehumidifiers, air washers, thermo hygrometers, aroma diffusers, blood pressure monitors, blood glucose monitors, mobile ECG devices, hearing amplifiers, pulse oximeters, nebulisers, clinical thermometers, a sleep sensor, wake-up lights, a snore stopper, brightlights, infrared lamps, TENS/EMS devices, massage products (foot massage, Shiatsu massage, massage chairs, massage cushions, fasciae massage, compression leg therapy), a relaxing aid, hair removal devices (classic, IPL, laser), FaceCare and HairCare products, a cellulite releaZer, cosmetics mirrors, manicure/pedicure sets, a BabyCare line, basal thermometers, activity sensors, an activity watch and heart rate monitors. USB ports and *Bluetooth*[®] enable an increasing number of Connect products to connect to the growing Beurer app world and/or software. The family-run company operates a global distribution network in more than 100 countries and currently has a workforce of around 1000. Further information is available at www.beurer.com.
