## Efficient air dehumidifiers: Another step towards a healthier indoor climate

Ulm, 6 September 2024 – Beurer has been successfully offering air purifiers, air washers and humidifiers in its product range for many years. Now, as awareness of a healthy indoor climate becomes increasingly prominent, the Ulm-based health specialist is set to present two new air dehumidifiers at IFA in Berlin, from 6 to 10 September 2024. These devices provide an effective solution for improving air quality and preventing humidity problems in living, working and basement spaces.

The optimum indoor humidity level is around 40-60%. With climate change and rising temperatures, challenges from increased humidity are also on the up. Excessive humidity can cause mould and moisture damage. Preventing this is where the new LE 150 and LE 250 air dehumidifiers from Beurer come into play.

### LE 150 and LE 250: Ideal for long-term dehumidification

The two Beurer air dehumidifiers ensure particularly fast and efficient air dehumidification, and are useful, for example, in helping to dry out new buildings, water damage or generally high indoor humidity in living and working spaces, bathrooms and basements. Using them can even prevent mould, condensation and musty odours. They make highly efficient humidity control possible thanks to the coloured indicator which displays the current humidity level; this can also be read as a numerical value on the display. In Automatic Mode, both devices ensure a healthy, balanced indoor climate with optimal humidity between 45% and 55%. They can also be programmed to maintain an individual air humidity between 30% and 80%.

The LE 150 delivers powerful dehumidification of up to 12 l/day, includes a 2-litre removable water tank and is suitable for rooms up to approx. 30 m<sup>2</sup>. The LE 250 dehumidifies up to 20 l/day, has a 4-litre removable water tank and can be used in rooms up to approx. 60 m<sup>2</sup>.

The LE 150 and LE 250 are each equipped with two speeds, a timer function (1-24h) and a Night Mode for particularly quiet operation and no lights to disturb sleep.

All Beurer highlights will be presented at IFA from 6 to 10 September 2024 in Hall 4.1  
at Stand 210.

**Social Media****About Beurer**

Beurer was founded in 1919 in Ulm and is synonymous with health and well-being. Today, the family-run company leads the way in several areas of this segment. Originally a manufacturer of heat pads and heated underblankets, the company has grown into a full-range supplier offering more than 500 products. Beurer offers various products for use at home in the categories of health, wellbeing, beauty, personal care, home, fitness and baby, including blood pressure and blood glucose monitors, clinical thermometers, pulse oximeters, nebulisers, hearing amplifiers, daylight therapy lamps, insect bite healers, a mobile ECG device and an emergency wristband, as well as products for pain therapy and women's health. The range also covers the areas of flexible heating, weight & diagnosis, air & aroma, massage & shiatsu and sleep & rest. What's more, Beurer offers various beauty products in the categories of FaceCare, BodyCare, HairCare, hair removal, manicure & pedicure, as well as a men's grooming range and electric toothbrushes in the personal care category. The company offers a range of fitness products in its Antelope by beurer and Physioline product groups, along with numerous abdominal muscle trainers. The baby category contains special products adapted to the needs of children, babies and their parents. With its "Connect" product group, the health specialist offers a wide range of apps that can be combined with Beurer products and make everyday life easier. Around 1,700 employees worldwide and a global distribution network spanning more than 100 countries ensure the company's ever-growing success.
