

## Wrist blood pressure monitors

Compact and easy to use, our wrist blood pressure monitors are handy at home and small enough to take with you on the go. For reliable results, always keep your wrist at heart level during measurement.

Watch our video tip on how to use a wrist monitor correctly

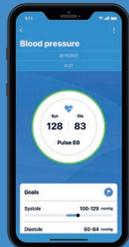

### BC 21 – Measure with voice output

- Clear, easy-to-read display
- Voice function: DE, EN, FR, IT, TR, other languages available
- Risk indicator: colour scale for easy interpretation of measurement results
- Arrhythmia detection

Bluetooth

### BC 54 – Easy reading of values via app

- Clear, easy-to-read black display
- Inflation technology: starts measuring during cuff inflation for faster results
- Wireless transfer of measurements to the "beurer HealthManager Pro" app
- Risk indicator: colour scale for easy interpretation of measurement results
- Arrhythmia detection
- For wrist circumferences from 13.5 to 21.5 cm

### "beurer HealthManager Pro" app

Compact and easy to use, our wrist blood pressure monitors are handy at home and small enough to take with you on the go. For reliable results, always keep your wrist at heart level during measurement.

#### New Scan & Save function. Scan your blood pressure values with your smartphone camera and save them in the app.

Recording your blood pressure values by hand is history! With "Scan & Save", your readings can be saved digitally from any Beurer blood pressure monitor to the HealthManagerPro app - even without Bluetooth®. Simply scan your result from the display of your blood pressure monitor with your smartphone camera, and the results will be automatically recognised and saved in the app.

## Blood pressure monitors

Indispensable at every age – preventive healthcare with blood pressure measurement.

## Upper arm blood pressure monitors

An upper arm blood pressure monitor is especially recommended for older people, smokers, and people with cardiac arrhythmia or diabetes. With correct cuff positioning, your blood pressure is taken at heart level for the most accurate and reliable result.

Watch our video tip on how to use an upper arm monitor correctly

### BM 28 – Reassurance with cuff position check and resting indicator

- Patented resting indicator for precise measurement results
- Reliable measurement, even during pregnancy
- Clear, easy-to-read display
- Cuff position check for correct positioning on the upper arm
