daily grind  
behind

Massage to-go, Shiatsu massage  
and massage range

Beurer  
for your  
well-being

Beurer has been the market leader in the **health** and **well-being** sector since 1919. Along with our cornerstone products for **flexible heating**, **blood pressure monitors** and **scales**, **Shiatsu massage** is one of our specialisms. We have skilfully combined **state-of-the-art technology** with treatment techniques from Asia. **The result:** Products that provide **soothing massage**, pleasantly easing and relaxing the body and muscles.

Shiatsu massage originates from Asia, and involves a soothing and relaxing pressure massage using the fingers, thumbs and palms. Our Shiatsu massage products imitate this movement. Depending on the intensity and pressure used, this type of massage can also act deep in the tissues and is ideally suited for relaxing the muscles and relieving any tension.

# Treatment points and massage types

State-of-the-art technology, precision and sophisticated motion sequences create a natural and soothing massage. State-of-the-art technology that can't be seen, but can certainly be felt!

**We want you to feel great.**

**Treatment points:** Targeted application directly on areas of discomfort ensures a long-lasting sense of well-being and relaxation, as well as loosening of the muscles.

**Type of massage:** The Beurer Shiatsu and massage range offers the right product for every treatment area, with tailored functionality options.

- 1. Shiatsu back massage**  
This massage type originating from Asia fuses the terms SHI = finger and ATSU = pressure. Using flowing, circular movements, this "finger pressure massage" guarantees holistic relaxation.
- 2. Shiatsu neck massage**  
This Asian "finger pressure massage" ensures holistic relaxation using flowing, circular movements in the neck area.
- 3. 3D Shiatsu massage**  
The three-dimensional, rocking movement along the spine helps to deeply relax the whole back.
- 4. Roll massage**  
The soft rolling massage along the spine combats muscular tension and offers soothing relaxation for the whole back.
- 5. Vibration massage**  
Applying soft waves, vibration massage loosens muscles, for an all-round warm and comforting feeling of relaxation.

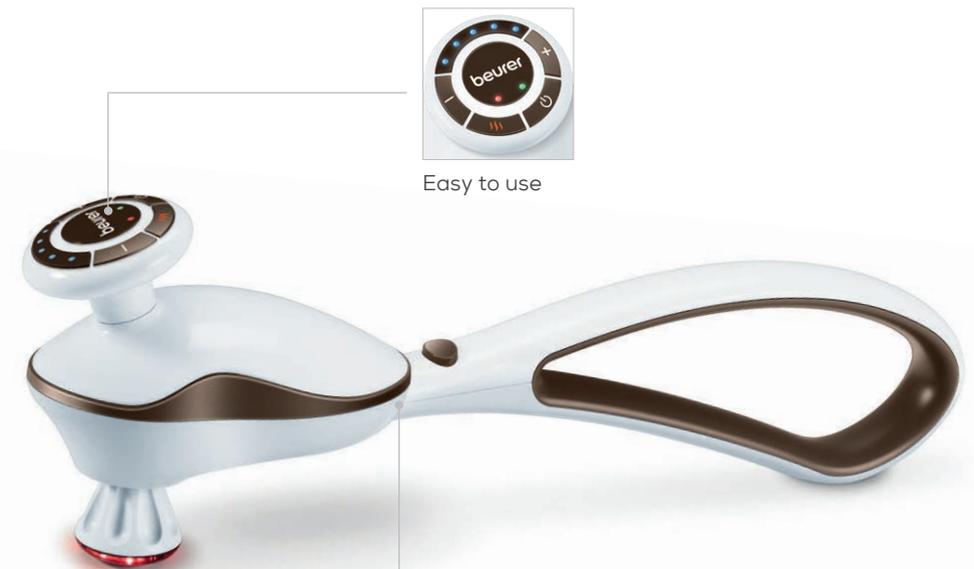

- 6. Spot massage**  
With this form of massage, you determine the precise application point of the massage yourself, by simply pressing a button. Soothing relaxation exactly where you need it.
- 7. Tapping massage**  
Using powerful and rhythmic tapping movements, this massage penetrates the deeper layers of muscle to help create a feeling of deep relaxation.
- 8. Kneading massage**  
A targeted and intensive kneading movement helps this massage to combat tension and promote circulation in the muscle and skin layers.
- 9. Air pressure massage**  
Gentle to intense air pressure within the supplied chambers helps to create a soothing pressure massage for targeted relaxation of the legs, calves and feet.
- 10. Swing massage**  
Dynamic swinging movements along the spine stimulate circulation and boost metabolism.
